

My experience learning a new language.

Gabriella Amanda Zacarias Barbosa.

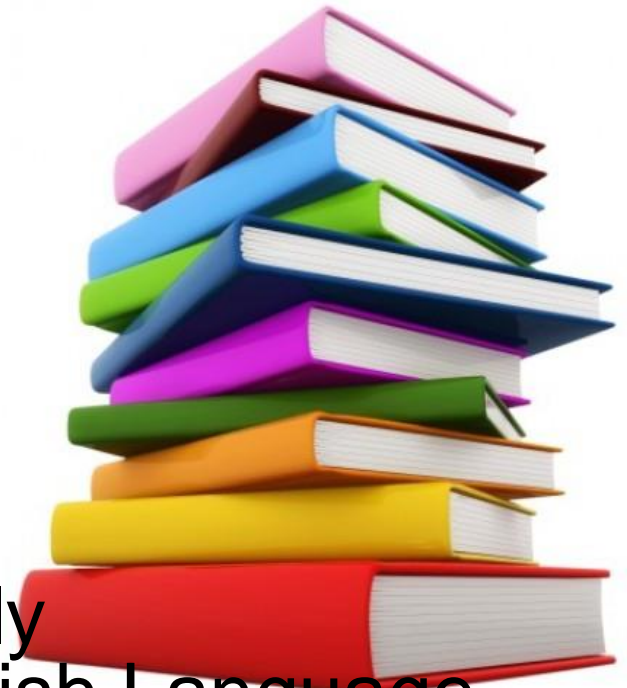

- Good morning everyone!
- I'm Gabriella, I was born in Patos de Minas. And now I live here in Uberlândia.

- I'm 18 years old, and study at the Federal University of Uberlandia.

My Experience

- I always studied in public schools until the beginning of high school.
- Only then I had a really good teaching of English Language.
- Unfortunately the teaching of English in Brazilian public schools is not of good quality, which harms many students.
- I never went to study English at a Language School.

The reason why I study

English

- Since the beginning of my studies I was always very interested in languages , perhaps because English is the first foreign language that I had contact with. I found it easy to listen, understand and write. I'm not very good with pronunciation.

I study English not only because I enjoy, but also because I need to know a little bit.

This, we all know, is very important for our relationships, studies, and so on.

Today

- Today I still have the opportunity to study English at the university, but I don't intend to continue it, although I like this language.

Busuu.com

- From an indication of our teacher, and in order to learn languages with new methods, I created a profile on the site "Busuu.com." There you interact with people from all over the world, with the same purpose, which is to learn new languages. It's simple, and very fun. It is worthwhile to join. I made many friends there and I managed to learn a lot.

Os brasileiros acreditam que a combinação de mais de um método para aprender idiomas será importante no futuro. Os métodos tradicionais já não são considerados eficientes

Future

- Since beginning studies in French language I was very interested, and I intend to pursue a career in it, and become a future French teacher.

- Thank you for your attention, it was great to be with you throughout this semester. And like our teacher says: xoxo! ;)
